

## TOWER CLEAN 1266

### COOLING TOWER WATER TREATMENT

Description	<p><b>Tower Clean 1266</b> is a specially blended tower scale and corrosion inhibitor designed to add the highest level of corrosion protection available in a single product. This product should be used where the Ryznar Stability Index is consistently in excess of 6.5. In addition to the phosphate protection component, <b>Tower Clean 1266</b> has extra molybdate corrosion inhibitor. The molybdate concentration should be maintained at an excess of 75 ppm. Be sure to monitor the system for corrosion data. In addition to a significant iron protection component, <b>Tower Clean 1266</b> has a tolyltriazole copper inhibitor to protect the copper parts of the system. The Phosphonate stabilizer and polymeric crystal modifier contained in this product have been added to inhibit the formation of scale on the heat exchanger surfaces.</p>												
FDA Compliance	<p>A FDA acceptance letter is not required for chemical products used in secondary cooling systems. A FDA letter is on file allowing use in food handling establishments as long as there is no contact between the chemical and the food process.</p>

<b>SPECIFIC GRAVITY:</b>	1.37												
<b>BOILING POINT:</b>	212 F												
<b>pH:</b>	12.9												
<b>EVAPORATION:</b>	1.0												
<b>SOLUBILITY IN WATER:</b>	Soluble												
<b>APPEARANCE AND ODOR:</b>	Brownish colored liquid, strong odor												
Dosage	<p>The most effective and economical dosage of this product will be determined by a <b>Chem-Tech</b> representative after a thorough analysis of the system.</p>												
Safety & Handling	<p>Please refer to the MSDS before using or handling any product. In case of emergency contact Chem-Tel 24 hours a day at 1-800-255-3924.</p>												
Storage	<p>Product should be protected from extremes in temperature. Store between 50-104 degrees F. Keep this and all chemicals away from flames and do not smoke or weld near container. <b>PROTECT THIS PRODUCT FROM FREEZING</b></p>
